

CYBERSECURITY & CISSP®

The cybersecurity program offers a range of introductory to advanced training for IT professionals and cover topics like Cloud data security and cryptography, malware, and risk management.

Cybersecurity is one of the most critical issues affecting organizations and individuals today, from the government to families.

The courses in this suite will help learners master the vocabulary of the industry and offer examples, videos, interactive games, and review questions.

As the amount of data being stored continues to increase, and as hackers become more sophisticated, the need for cybersecurity is greater than ever.

Course list

- ▶ Certificate in Cybersecurity
- ▶ Real-World Cybersecurity Scenarios
- ▶ CISSP® Exam Prep Course
- ▶ CompTIA Security+® Exam Prep Course

Why Cybersecurity Training?

For either advancement or changing careers, there are many reasons for Cybersecurity training, including a strong demand in the job market, the pay, the opportunities.

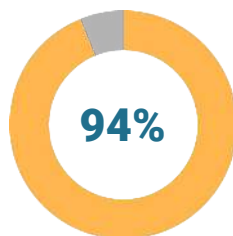

For companies looking to protect their valuable data and information, Cybersecurity training has plenty of benefits. Cybersecurity training helps lessen the exposure to Cybersecurity risks, lowers costs due to lower frequency of cyber-related loss-incidents, and creates a positive staff culture regarding cyber and information security.
