

WHY EARN THE PMSCP® CERTIFICATION?

Interpersonal Skills. Durable Skills. Power Skills. Soft Skills. People Skills. Regardless of what you call them, data shows that they contribute to project success by as much as 85%, and employers seek these skills nearly four times more than the top five technical or hard skills. The courses included in the PM Skills® PMSCP® certification are focused on developing and displaying your expertise in interpersonal skills.

WHAT WILL I LEARN?

The PM Skills® PMSCP® certification includes 14 courses and the certification exam:

- PM Skills® Interpersonal Skills for Project Leaders

- PM Skills® PMSCP® Certification Exam

CAREER PATHS

The U.S. Bureau of Labor Statistics (BLS) expected that overall employment of project managers is projected to grow 6% from 2022 to 2032, faster than the average for all occupations. Over 68,000 openings are projected each year, on average, over the decade. Careers in project management span industries like construction, marketing, information technology, biotechnology, and sustainable energy. Common project management career paths or growth opportunities include:

Creative Project Manager

As a creative project manager, you are the architect of seamless collaboration, ensuring that artistic visions flourish, meet deadlines, and stay within scope. With background knowledge of marketing, you become an expert at supervising creative initiatives within an organization or for clients.

Technical Project Manager

If you have experience in information technology, becoming a technical project manager and leading technical teams within an organization may be the path for you. Since it requires both technical and management skills, technical project management can best be thought of as a hybrid role.

Project Coordinator

Within the broader scope of project management, a project coordinator organizes and manages the various parts of a project to ensure its success. This includes assigning and monitoring daily tasks and communication, as well as creating reports and updates for members of management.

The PM Skills® PMSCP® courses and certification exam are available 100% online.
